REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed invention is deemed allowable over the prior art in view of the applicant's arguments filed December 29, 2003 and since the prior art fails to teach a flying rotary disk containing a non-flat embossment figure that is not uniform in thickness wherein the thick regions present a dark image and the thin regions present a light image upon the back side being radiated by light and that has a round outer edge. The reference to Slipp is drawn to a display panel and not to round rotary disk articles and therefore distinguishable there over. While the reference to Kline, at figure 1, shows a round panel that is used in windows and doors the examiner does not believe this to be a round flying disk. Kline also teaches away from the instant claims since Kline teaches the panel to be transparent (column 3, lines 14-16 and column 5, lines 3-7) and not leading one to the light and dark image limitations as recited in the instant claims. Kline also teaches the panel to simulate cut or stained glass (column 4, lines 44-51).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
